SimpleForms is driven to do the unexpected. We are always exploring new possibilities for the constraints generated by our ideas. We try focusing our critical thinking skills to research and define new approaches for existing products or services and maybe, to accomplish the creation of new categories.

In this process we always try to redefine the specifications of design solutions which can lead to better guidelines for traditional design. We try to achieve our goals by managing the process of exploring, defining, creating artefacts continually over time, with our tradition and the possibilities offered by cutting edge technology.

We are trying to be in a continuous process of prototyping possible scenarios, or solutions that significantly improve the inherited situation previously created by our inspiration
