

sistema visto exposed system

Es aquel en el que el elemento de sujeción de la baldosa cerámica es visible. En este caso el elemento de sujeción puede ser pintado del mismo color que el azulejo con el fin de mejorar el acabado de la fachada.

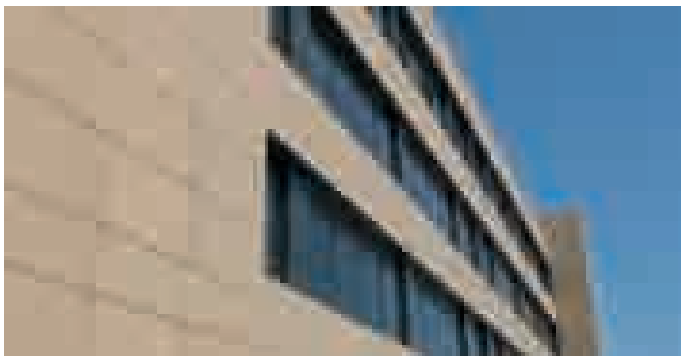

Se puede observar un sistema de grapa Vista formado por una escuadra que ancla el perfil al muro, un perfil hueco al cual se le fija el sistema de retención y por último las grapas que se encargan de fijar el azulejo a la estructura.

Cabe destacar que la utilización de uno u otro sistema, tanto del mostrado en el ejemplo como de otros existentes en el mercado, estará en función de las necesidades y preferencias del cliente.

The exposed system is one in which the tile anchorage elements are visible. In this case the fixing components can be painted the same colour as the tile in order to improve the appearance of the façade finish.

It may be observed that the type of track profile employed is a "T" profile and that the exposed clamps are screwed directly to the track.

It should be emphasised that the use of one system or another, either one of those shown in these examples or any of the others currently on the market, will depend on client needs and preferences. In this final example of an exposed system the anchorage is fixed directly to the wall, avoiding the use of any kind of profile.
