

SIDERAL, INFINITE SPACE

Ceramics or marble? Vives Cerámica proposes both of them in perfect synch with its new Sideral series.

Ceramic pieces in rectified porcelain tile with two complementary sizes: 40 x 60 and 20 x 60 cm with textures that are identical to white marble; perfect for being used as floor and wall tile, combined with natural marble in gray tonalities and conforming a body mesh. The union of the small Sedna and Cometa pieces in 7,5 x 7,5 cm creates an infinite mesh of shadows and volumes of an exceptional decorative beauty. An avant-garde style and exclusivity combined in the same collection.
