

ARQUINIA AND KENION, INNOVATION AND TECHNOLOGY

Products in constant development with new technological and revolutionary designs. Incredible textures with incomparable quality. Vives presents products with a clear contemporary inspiration and a High Tech style.

To create this products, we have based on the concrete, a decorative element which has every day more supporters thanks to its different finishes and textures. It is an element with a great potential. In this case, Vives uses the porcelanic as the row material ideal to achieve an accurate reflection of this material.

Arquina series (60x60 cm.) with a glossy finish and a wide chromatic range, which goes from the warm colours as sand, bone and musgo to cold colours as gris cemento, grafito and antracita is perfect for many spaces in our homes and even for projects focused on the contract.

The Kenion series (60x60 cm.) has a semipolished finish which gives it a hard and elegant appearance. This look provides this product a high level of innovation and technology. This series is made in the following colours: carbon, cacao, ceniza and albar. It has an atemporary design suitable for countless projects.
