CATALOGO GENERAL

GENERAL CATALOGUE • CATALOGUE GÉNÉRAL • CATALOGO GENERALE

A través de este catálogo, desde ALUMACER COMPLEMENTOS queremos compartir contigo nuestra extensa gama de perfiles, listelos, peldaños, mosaicos y otros complementos. Nuestras piezas ofrecen al usuario final funcionalidad y pragmatismo, con un cuidado diseño y acabado. Como comprobarás, nuestra gama comercial incluye modelos en aluminio (6063), acero inoxidable (aisi 304) y pvc, así como mallas de mosaico y otros pequeños accesorios.

Como novedades en este catálogo, tenemos el placer de presentarte los clips y cuñas de auto-nivelación, los peldaños dotados de cinta de seguridad con un gran abanico de acabados, el nuevo peldaño decorativo para pavimentos de gran espesor y la junta de dilatación 5x10 mm.

ALUMACER COMPLEMENTOS is delighted to present its new catalogue with our range of trims, listelos, step-treads, mosaics and other complementary pieces. Our range offers functionality and pragmatism with an elegant touch. Our range includes models in aluminium (6063), stainless steel (AISI 304) and PVC, as well as mosaic sheets and other small accessory pieces.

Amongst the new items in this year's catalogue, we are happy to introduce our self-levelling range with clips and wedges, step-treads with safety tape and a new decorative step-tread for large floor tiles and a new expansion joint in 5x10 mm.

A travers de ce catalogue, depuis ALUMACER COMPLEMENTOS nous souhaitons partager avec vous notre gamme de profils, listels, nez de marche, mosaïques et autres compléments. Nos pièces offrent la fonctionnalité et le pragmatisme, avec une finition et un design élégant. Vous pouvez vérifier que notre gamme commerciale inclue des modèles en aluminium (6063), acier inoxydable (AISI 304) et PVC, ainsi comme des mosaïques sur trame et autres petits accessoires.

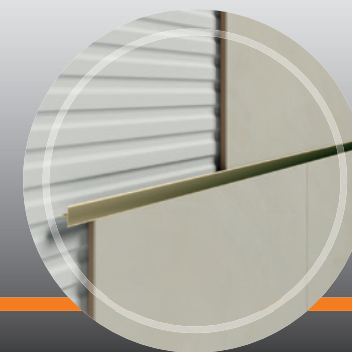

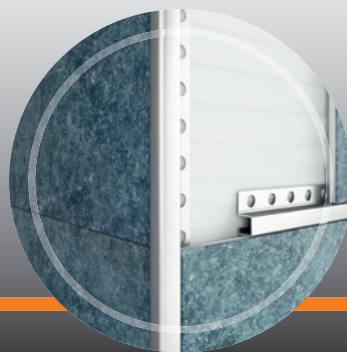

Comme nouveautés sur ce catalogue, nous avons le plaisir de vous présenter les clips et coins auto-nivelant, les nez de marches avec un ruban de sécurité avec un grand éventail de finitions, nous avons un nouveau nez de marche décoratif pour pavement de grand épaisseur et le joint de dilatation de 5x10 mm.

Attraverso il nostro catalogo ALUMACER vogliamo condividere con voi la nostra ampia gamma di profili, listelli, gradini, mosaici e altri complementi. Nostri prodotti offrono ai nostri clienti funzionalità con un curato dettaglio e finiture. Come si evince dal catalogo, la nostra gamma include modelli in alluminio 6063 e acciaio inox AISI 304, mosaici su rete e altri accessori.

Come novità in questo catalogo abbiamo il piacere di presentare i clips e profotti di auto-livellamento, gradini dotati di una finitura di dicurezza antiscivolo con una gamma di varie finiture, il nuovo gradino decorativo da pavimento di gran spessore e il giunto di dilatazione 5x10 mm.

OTROS COLORES DISPONIBLES / ADDITIONAL COLOURS

PELDAÑO ANTIDESLIZANTE

Nueva colección de peldaños dotados de cinta autoadhesiva de alta calidad con elevado coeficiente de fricción y gran durabilidad. La cinta abrasiva de nuestros peldaños está compuesta por gránulos de óxido de aluminio con carga eléctrica sobre un base de polímero de resina y su colocación proporciona un agarre seguro incluso en condiciones de humedad, así como una alta visibilidad de los escalones gracias a la diversidad de colores disponibles y acabados foto-luminiscentes.

ANTI-SLIP STEP-TREAD

A new collection of step-treads with high quality, durable self-adhesive tape with an excellent coefficient of friction. The upper surface of the non-slip tape consists of abrasive aluminium oxide particles held in place by a polymer resin, with the granules charged with static electricity prior to setting to help point upward and increase grip levels. Their use gives a firm non-slip finish even in humid conditions, as well as high visibility on stairs thanks to the diversity of colours available and the photo-luminescent finishes.

PERFILES DE ACERO INOXIDABLE

Gama de perfiles fabricada en acero inoxidable de alta calidad (AISI 304) que garantiza una excelente resistencia a la corrosión y al paso del tiempo.
Gran variedad de modelos con acabado en alto brillo o efecto "lija", especialmente diseñados para adaptarse a sus necesidades.
Nuestros productos en acero inoxidable vienen protegidos individualmente con film para asegurar la recepción del producto en inmejorables condiciones.

STAINLESS STEEL TRIMS

A range of profiles and trims manufactured with high quality raw material (AISI 304) which guarantees an excellent resistance to corrosion and the passage of time. A large variety of models finished with a high shine or a brushed finish, specially designed to adapt to your needs.
Our products in stainless steel are individually protected with film to ensure you receive the product in perfect conditions.

PROFILÉS EN ACIER INOXIDABLE

Une gamme de profilés qui est fabriqué en acier inoxydable de haute qualité (AISI 304) qui garantie une excellente résistance à la corrosion et au passage du temps. Une grande variété de modèles avec une finition ultimium de brillant ou efect brossé. Spécialement conçu pour s'adapter à vos besoins.
Nos produits en acier inoxydable vont protégés individuellement avec un film pour assurer la recpetion du produit dans des conditions imbattables.

PROFILI IN ACCIAIO INOX

Gamma di profili fabbricata in acciaio inossidabile di alta qualità (AISI 304) che garantisce una eccellente resistenza alla corrosione e alla durata nel tempo. Gran varietà di modelli con finitura altamente brillante o effetto spazzolato, specialmente disegnati per adattarsi alle sue necessità. I nostri prodotti in acciaio inossidabile, vengono rivestiti individualmente con pellicola protettiva per assicurare la ricezione del prodotto nelle migliori condizioni.

La gama funcional por excelencia. Más de 26 años fabricando perfiles de PVC nos permite disponer de una gama amplia, que cubre las necesidades de clientes con grandes consumos. Dentro de esta gama comercial, disponemos de una extensa y variada selección de colores, tanto lisos como marmoleados, que permiten su fácil adaptación a multitud de revestimientos, así como de una serie de modelos y accesorios enfocados hacia el profesional de la instalación, tales como perfiles para yeso o mortero monocapa, cuñas y crucetas.

The functional range par excellence. More than 26 years manufacturing PVC profiles means we have a wide range of PVC products covering the needs of large volume customers. Within this commercial range we have a wide and varied selection of colours, both plain and marbled, allowing our customers to adapt their offer to a wide range of wall tiles. We also offer a series of models and accessories aimed at the professional installer, such as angle beads, wedges and cross spacers.

Une gamme fonctionnelle par excellence. Plus de 26 ans de fabrication de profilés en PVC qui nous permet d'avoir une ample gamme, qui réponds aux besoins des clients qui ont une grande consommation. Dans cette gamme commercial, nous disposons d'une gamme complete et une variété de couleurs, autant en lisse que en marbré, qui nous permet une facilité d'aptation aux multiples faïences, ainsi comme une série de modèles et accessoires qui sont ciblés pour les professionnels, comme les profilés pour plâtre ou monocouche de mortier, croisillons et coins.

La gamma funzionale per eccellenza. Più di 26 anni fabbricando profili in PVC permettendoci di disporre di una ampia gamma per coprire le necessità dei clienti di grande consumo. Dentro questa gamma commerciale, disponiamo di un'estesa varietà di colori in tinta unita, marmorizzati che permettono la sua facile adattabilità alle molteplici varietà di rivestimenti così come una serie di modelli e accessori focalizzati alla istallazione professionale come profili per il gesso o malta da sigillo monó cappa, cunei e distanziatori.

RECOMENDACIONES DE COLOCACIÓN Y LIMPIEZA

PVC

- 1.- Alinear correctamente el perfil en la esquina, asegurándose que el material utilizado para la colocación pase a través de los agujeros en el ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala del perfil para asegurar una buena fijación.
- 3.- Una vez finalizado este proceso, tan solo quedará limpiar minuciosamente el material de colocación sobrante.

La mayoría de productos de limpieza que podemos encontrar en el mercado, no afectan ni alteran el PVC en la gama de colores lisos. Sin embargo, la manipulación y limpieza de los perfiles decorados es muy delicada, recomendando su limpieza solamente con agua limpia y un paño o esponja no abrasivos.

ALUMINIO

- 1.- Alinear correctamente el perfil, asegurándose que el material utilizado para la colocación pase a través de los agujeros del ala troquelada del perfil.

- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala del perfil para asegurar una buena fijación.
- 3.- Una vez finalizado este proceso, se procederá a la limpieza inmediata y cuidadosa del perfil. Este es un punto de gran importancia, debido a que el anodizado de los perfiles de aluminio es muy sensible a los materiales alcalinos y otros compuestos presentes en los materiales de fijación. Recomendamos su limpieza con agua limpia y jabón neutro, utilizando un paño o esponja no abrasivos. De esta forma, se evitará la aparición de manchas por corrosión en el anodizado y cambios de aspecto no deseados.

ACERO

- 1.- Alinear correctamente el perfil, asegurándose que el material utilizado para la colocación pase a través de los agujeros en el ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala para asegurar una buena fijación.
- 3.- Es muy importante que, una vez finalizado el proceso de colocación, se proceda a la limpieza inmediata del perfil para evitar cambios de aspecto y posibles marcas por corrosión. Recomendamos su limpieza con agua limpia utilizando un paño o esponja no abrasivos.

IMPORTANTE

Tonos:

Debido a las características de las materias primas utilizadas en la fabricación de nuestros productos, es posible que haya variaciones de tono entre diferentes producciones. Por este motivo, no se aceptará ninguna reclamación por diferencia de tonos.

Incidencias en el transporte:

En el caso en que la empresa organice el transporte de la mercancía, al recibir el pedido, será imprescindible que el comprador revise la total conformidad y el perfecto estado del mismo. Si no estuviere de acuerdo con los productos entregados, para poder efectuar una reclamación por daños en la mercancía, el comprador deberá firmar e indicar a mano en el albarán de entrega de la agencia de transporte las anomalías encontradas al recibirlo (Ejemplo: embalaje en mal estado, no coincidencia entre el número de bultos entregados y el número de bultos que figura en el albarán de entrega, etc.). El plazo máximo para efectuar la reclamación será de 7 días. De no cumplirse con todo lo anteriormente expuesto, el comprador no podrá reclamar daños a la agencia de transporte y la empresa no podrá asumir responsabilidades por cualquier daño o pérdida.

FIXING AND CLEANING INSTRUCTIONS

PVC

1. Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.
2. Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
3. Carefully clean away excess fixing material.

The majority of cleaning products on the market will not damage or discolour your plain coloured PVC trims. However, decorated finishes are more delicate, and they should be carefully cleaned with a damp non-abrasive cloth or sponge.

ALUMINIUM

1. Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.

2. Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
3. Carefully clean away excess fixing material. This is crucial as anodized aluminium may be damaged by alkaline and other ingredients contained in fixing material. We recommend cleaning the trim with clean water and neutral detergent and a non-abrasive cloth or sponge. Immediate cleaning is required to avoid corrosion stains on the anodized finish and unwanted change in the appearance of the trim.

STAINLESS STEEL

1. Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.
2. Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
3. Carefully clean away excess fixing material to avoid possible corrosion stains and changes in the appearance of the trim. We recommend cleansing with a non-abrasive cloth or sponge.

IMPORTANT

Tones:

One of the normal characteristics of the raw material used in the manufacture of our products is the possibility of tone variations in different production runs, and so no claims can be accepted for this concept.

Transport:

If the company organizes delivery of the merchandise, the purchaser must check the merchandise upon receipt of the material, ensuring that the products correspond to the material sent and indicated on the delivery slip and that the material shows no sign of damage and is in perfect condition. If any discrepancy exists either in the quantity of material delivered or in the state of the material, then all damages and shortages should be noted on the transport agencies delivery slip (for example, damaged material, discrepancy between amounts delivered and amount on delivery slip etc.). All claims must be made within 7 days of reception of the merchandise. No claims will be accepted after this period. If no discrepancies are noted upon reception, neither the transport agency nor the company can accept claims for damages or loss.
