

BLAUTHERM by Ramon Soler®

A thermostatic valve with a waterfall

Ramon Soler® has launched a new design in thermostatic valves for the most contemporary bathrooms. Its gracious style adapts to any type of bathroom and decorative style.

Waterfall water tap

The **Blautherm** with a curtain wall spout gives us a natural water flow which provides us with beauty as well as health. The falling water creates a great cascade and gives our bathroom a luxurious feel. There is a flow limiter which limits water consumption and contributes to energy saving.

Blautherm 9339 S is a high level tapware, technically advanced and highly detailed. The **Ramon Soler®** thermostatic cartridge is made in house, with high fidelity, strength and has been developed with safety and user comfort in mind.

TECHNOLOGY: It has the COOLTOUCH system as well as Termostop, noise protection and the HotBlock.

- **COOLTOUCH:** this reduces the possibility of scalding by 100%. **Ramon Soler®** thermostatic tapware operates at a constant lukewarm temperature guaranteeing that hands, be they young or old, do not get burnt.
- **Termostop Block:** These avoid scalding, especially with users which are handicapped and also save on hot water consumption. For hospitals or old people homes, we recommend limiting the hot water temperature by blocking the travel of the tap handle.
- **HotBlock:** In the event that the cold water supply would fail, it has an automatic blockage system which limits the amount of water exiting at a high temperature and saving the user serious burns.

Unbeatable QUALITY-PRICE: Blautherm has a spectacular design and affordable price.

Producer: Industrias Ramon Soler

Model: Blautherm (Ref. 9339 S)

Design: In house team

Technical Data:

- Rapid response to temperature variations. Max. response time 1 second.
- Acoustic level at 3 bar < 20 dB.
- Water flow: Bath flow 19 l/min, Shower flow 11 l/min
- ITermostop temperature blocking system (38°C) incorporated.
- Instalación mínima recomendada con calentadores a gas o eléctricos a partir de 10 litros y una potencia de 18 kW
- Recommended pressure : from 1 to 5 bar. (The pressure difference between hot and cold water should not be more than 1 bar.)
- Chrome: 15 micras of nickel, 0.3 micras of chrome
- HOTBLOCK antiscalding system incorporated.
- COOL TOUCH
