

TERMOJET by Ramon Soler®.

The Thermostat for the New Age

Continuing the advances made in sustainability and, as usual, keeping one step ahead of all the latest trends, **Ramon Soler®** presents **TERMOJET**, a high-range, elegant, technically advanced thermostat, a product that is, moreover, irresistibly priced.

TERMOJET is manufactured entirely from metal, including the handles. This is tapware designed to react to temperature changes in less than one second, preventing accidents due to scalding thanks to the patented **Hotblock**, a real breakthrough by the Industrias Ramon Soler R+D+i team.

This is ultra-modern, ergonomic tapware that adapts perfectly to all styles. Moreover, **TERMOJET**, which is fitted with the **S3** water and energy saving system, is environmentally-friendly both at the manufacturing stage and during use.

Ramon Soler®: leading the field in design and ecoefficiency.
