

Two new extensible kitchen taps by Ramon Soler®

The **3379 V1 Drako** and the **9379 V1 RS-Q** tap: they share the same technical characteristics and are slightly different by the shape of their handles.

A fantastic meal is always well remembered. We always remember with relish those moments, and thus the kitchen is an important part of our daily life.

Whether it be at home or in a professional kitchen, all kitchen accessories must be the highest quality. **Ramon Soler®** maintains its highest technical advances making cooking a breeze.

Ramon Soler® is always conscious of market needs and necessity for constant evolution. That is why the extensible **3379 V1 Drako** and the **9379 V1 RS-Q** models share technical specifications but differ slightly in aesthetics.

These taps are two high vertical faucets with the extensible hand showers which incorporate the metallic V1 with 2 jets with an elegant and innovative design

Both taps have pure lines, having a clean arc with the rounded spout and as a result the line between the spout and the spray handle is very difficult to distinguish. It is also able to be withdrawn with greater comfort.

The **3379 V1 Drako** is a refined design with a slim line handle and the **9379 V1 RS-Q** has a more robust and rounded line.

3379 V1 DRAKO

9379 V1 RS-Q

The single lever mixers have a high 45cm spout. This spout is also swivel and due to its size helps us to wash large pans or utensils with relative ease. It is a perfect fusion between functionality and design which helps it blend into any kind of kitchen, whatever the decorative style.

These models incorporate a ceramic cartridge which has been wholly developed in **Ramon Soler®**. This incorporates the S2 water saving system which has been patented, which gives these taps a water saving and security advantage. Our five year guarantee proves **Ramon Soler®**'s conviction to high standards of quality.

Once again, **Ramon Soler®** responds to the needs of a marketplace in constant evolution, making the kitchen a safe, comfortable incorporating exquisite taste.

Manufacturer: Industrias Ramon Soler®

Model: DRAKO (Ref. 3379 V1)

Design: In house team

Manufacturer: Industrias Ramon Soler®

Model: RS-Q (Ref. 9379 V1)

Design: In house team

Características:

9000 cartridge.

Pressure at 3 bar: 14 l/min.

Sound level at 3 bar: < 20 dB.

Chrome: 15 microns of nikel, 0.3 microns of Chrome.

Saline tests norm EN-248.

Fidelity, Sensibility and Constant temperature selection.

Recommended pressure use from 1 to 15 bar.

Static pressure resistance > 10 bar and pressure changes of up to 50 bar.

5 year guarantee.
