Mantenimiento
Cleaning of the bath should be carried out using a soft sponge, soap and water. After cleaning, the bath should be dried so as to prevent limescale forming. No abrasive products, solvents or objects that could damage the bath surface should be used. Should the bath surface be scratched accidentally, it should be enough just to go over the surface with a solvent-free polish. If necessary, the scratch can first be wet-sanded with 800 G wet-and-dry sandpaper, then wet-sanded with 1200 G paper, before finally applying the polish.
