# Colección LED

LED collection  
Collection de LED  
Collezione LED

**Colección de listelos, perfiles y peldaños especialmente diseñados para albergar sistemas de iluminación mediante diodos LED. Nuevos modelos que facilitan la incorporación de iluminación LED a sus ambientes más exclusivos y zonas que requieran ser especialmente visibles como las escaleras.**

**(EN)** A range of trims, Profiles and step-treads especially designed for LED illumination systems. New models that facilitate the incorporation of LED lighting into your most exclusive areas, and in settings that require special visibility, such as stairways.

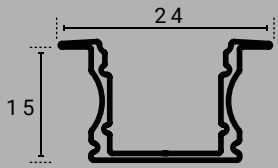

**(FR)** Collection de listelos, profils et marches spécialement conçus pour les systèmes d'éclairage utilisant des diodes à LED. De nouveaux modèles facilitant l'intégration de l'éclairage LED dans les environnements les plus exclusifs et les zones devant être particulièrement visibles comme les escaliers.

**(IT)** Collezione di listelli, profili e gradini appositamente progettati per ospitare sistemi di illuminazione a LED. Nuovi modelli che facilitano l'integrazione dell'illuminazione a LED negli ambienti più esclusivi e nelle aree che richiedono una visibilità speciale come le scale.

# Sistemas de nivelación

Levelling systems

Systemes de nivellement

Sistemi de livellamento

Sistema diseñado para nivelar y espaciar las piezas cerámicas durante la instalación de revestimientos y pavimentos. Este sistema permite instalaciones perfectas sin desniveles y de ancho de junta uniforme. El espesor del clip determinará la anchura de la junta entre las piezas, mientras que la cuña aportará una nivelación perfecta entre las baldosas cerámicas una vez colocada en el clip.

(EN) A system designed to level and space wall and floor tiles. With this system say goodbye to lippage with perfectly levelled and perfectly spaced tiles. The thickness of the clip determines the width of the tile joint, with the insertion of the wedge into the clip giving a perfect level finish.

(FR) Système conçu pour le nivellement et l'espacement de pièces céramiques lors de l'installation de revêtements et trottoirs. Ce système permet des installations parfaites sans inégalités et avec un joint uniforme. L'épaisseur du clip détermine la largeur du joint entre les pièces, tandis que le coin assure un nivellement parfait entre les carreaux de céramique une fois placés dans le clip.

(IT) Sistema progettato per livellare e posizionare pezzi ceramici durante l'installazione di rivestimenti e pavimentazioni. Questo sistema permette installazioni perfette senza dislivelli e giunti uniformi. Lo spessore della clip determinerà la dimensione del giunto tra i pezzi, mentre il cuneo fornirà un perfetto livellamento tra le piastrelle una volta posizionate sulla clip.

## Instrucciones uso

Instructions - Istruzioni

**Aplicar el clip con la base bajo la pieza cerámica.**

Apply the clips underneath the ceramic tiles while laying.

**Insertar la cuña en el clip ajustándola con la mano.**

Insert the wedge in the clip adjusting by hand.

**Regular la anchura de la pinza y el limitador de recorrido del alicate (rosca superior).**

Regulate the position of the pliers and the pressure of application to achieve a firm fit without oversqueezing. This only needs to be done once per installation.

**Presionar con suavidad la cuña en el interior del clip con el alicate previamente ajustado. Las piezas de cerámica se nivelarán al ejercer presión la cuña sobre las piezas contiguas, no es necesario aplicar una gran presión sobre el conjunto.**

Pressure the wedge gently until the tiles level. Do not oversqueeze. Tiles will level naturally when wedge is inserted firmly.

**Dejar secar el adhesivo siguiendo las instrucciones del fabricante.**

Allow the adhesive to dry following manufacturer's instructions.

**Una vez seco el adhesivo, golpear el clip y la cuña en sentido perpendicular a la cuña. No extraer la cuña antes de romper el clip.**

Break the clip sideways. Do not remove the clip before breaking. Break with a rubber hammer or by kicking the piece.

# Sistema eco para revestimientos y formatos pequeños y medianos

Eco System for wall tiles and small and medium floor tiles  
 Systeme Eco pour revêtements et petits et moyens formats  
 Sistema Eco per rivestimenti e piccoli e medi formati

Sistema de nivelación de dimensiones muy compactas, disponible para junta de 1 mm. de espesor especialmente indicado para los formatos de cerámica más pequeños. Gracias a sus reducidas dimensiones, puede utilizarse en zonas de instalación más complicadas por el reducido espacio existente o en las que no puede utilizarse el alicate de forma cómoda, presionando simplemente con la mano.

A levelling system of reduced dimensions, available in 1 mm. width, specially designed for use with smaller wall and floor tiles. One of its main advantages is that thanks to its reduced dimensions, the system can be used in smaller spaces where use of the pliers is difficult, with the wedge easily inserted by hand.

# Sistemas de Rosca

Screw top levelling systems - Système de nivellement filetage - Sistema di livellamento filettatura

## Instrucciones uso

Instructions - Istruzioni

- Colocar el clip blanco con la base bajo la pieza cerámica.**  
Apply the white clips underneath the tiles during laying.
- Introducir el disco protector de color negro en la punta roscada del clip para proteger la cerámica.**  
Insert the protective disk over the clip to protect the tiles.
- Girar la rosca roja en el clip hasta nivelar las piezas de cerámica.**  
Screw on the red screw piece until the ceramic tiles are levelled.
- Dejar secar el adhesivo siguiendo las instrucciones del fabricante.**  
Allow the adhesive to dry following manufacturer's instructions.
- Una vez seco el adhesivo, y sin quitar la rosca, golpear el clip siguiendo el sentido de la junta. Recoger la rosca roja y los protectores negros para su reutilización.**  
Once the adhesive is dry, and before removing the red screw piece, break the clip by striking it following the direction of the tile joint. Collect the red screw piece and the black protectors for their reuse.

## Instrucciones uso

Instructions - Istruzioni

- Colocar los azulejos con cemento cola con una junta de entre 1.5 y 8 mm.**  
Lay the tiles on the tile adhesive, between 1.5 and 8 mm apart.
- Insertar la aguja de metal en forma de T en la junta entre los azulejos y rotar 90° hasta formar un ángulo recto con los azulejos.**  
Insert the T-shaped metal needle into the tile joint and rotate 90° so it is at right angles with the tile.
- Los azulejos se nivelan apretando la rosca negra, asegurándose que la aguja de metal sigue en ángulo recto (las agujas tienen la misma orientación que la parte naranja). Terminar de apretar con la herramienta. Se puede ayudar a la nivelación presionando suavemente los azulejos.**  
Level the tiles by rotating the black nut, making sure the T part does not rotate at the same time (the needle follows the orientation of the orange handle). Tighten the installation with the levelling wrench if desired. You can help levelling by gently pushing down on the tiles.
- Una vez que el cemento cola esté seco, o preferiblemente un poco antes de su fraguado total, desenroscar la rosca negra, girar de nuevo la aguja en sentido opuesto al que la hemos instalado hasta que esté paralelo con las juntas y retirar. Limpiar la pieza y reutilizar a su conveniencia.**  
Once the tile adhesive is dry, or preferably just before it is fully dry, unscrew the black nut and rotate the T part until it is aligned with the tile joint, and simply lift out. Clean the piece and reuse as desired.

## Recomendaciones de colocación y limpieza

### PVC

- 1.- Alinear correctamente el perfil en la esquina, asegurándose que el material utilizado para la colocación pase a través de los agujeros en el ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala del perfil para asegurar una buena fijación.
- 3.- Una vez finalizado este proceso, tan solo quedará limpiar minuciosamente el material de colocación sobrante.

La mayoría de productos de limpieza que podemos encontrar en el mercado, no afectan ni alteran el PVC en la gama de colores lisos. Sin embargo, la manipulación y limpieza de los perfiles decorados es muy delicada, recomendando su limpieza solamente con agua limpia y un paño o esponja no abrasivos.

### ALUMINIO

- 1.- Alinear correctamente el perfil, asegurándose que el material utilizado para la colocación pase a través de los agujeros del ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala del perfil para asegurar una buena fijación.
- 3.- Una vez finalizado este proceso, se procederá a la limpieza inmediata y cuidadosa del perfil. Este es un punto de gran importancia, debido a que el anodizado de los perfiles de aluminio es muy sensible a los materiales alcalinos y otros compuestos presentes en los materiales de fijación. Recomendamos su limpieza con agua limpia y jabón neutro, utilizando un paño o esponja no abrasivos. De esta forma, se evitará la aparición de manchas por corrosión en el anodizado y cambios de aspecto no deseados.

### ACERO

- 1.- Alinear correctamente el perfil, asegurándose que el material utilizado para la colocación pase a través de los agujeros en el ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala para asegurar una buena fijación.
- 3.- Es muy importante que, una vez finalizado el proceso de colocación, se proceda a la limpieza inmediata del perfil para evitar cambios de aspecto y posibles marcas por corrosión. Recomendamos su limpieza con agua limpia utilizando un paño o esponja no abrasivos.

### IMPORTANTE

Tonos:

Debido a las características de las materias primas utilizadas en la fabricación de nuestros productos, es posible que haya variaciones de tono entre diferentes producciones. Por este motivo, no se aceptará ninguna reclamación por diferencia de tonos.

Incidencias en el transporte:

En el caso en que la empresa organice el transporte de la mercancía, al recibir el pedido, será imprescindible que el comprador revise la total conformidad y el perfecto estado del mismo. Si no estuviese de acuerdo con los productos entregados, para poder efectuar una reclamación por daños en la mercancía, el comprador deberá firmar e indicar a mano en el albarán de entrega de la agencia de transporte las anomalías encontradas al recibirlo (Ejemplo: embalaje en mal estado, no coincidencia entre el número de bultos entregados y el número de bultos que figura en el albarán de entrega, etc.). El plazo máximo para efectuar la reclamación será de 7 días. De no cumplirse con todo lo anteriormente expuesto, el comprador no podrá reclamar daños a la agencia de transporte y la empresa no podrá asumir responsabilidades por cualquier daño o pérdida.

## Fixing and cleaning instructions

### Recommandations de placement et nettoyage - Raccomandazioni di posizionamento e pulizia

### PVC

- 1.- Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.
- 2.- Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
- 3.- Carefully clean away excess fixing material.

The majority of cleaning products on the market will not damage or discolour your plain coloured PVC trims. However, decorated finishes are more delicate, and they should be carefully cleaned with a damp non-abrasive cloth or sponge.

### ALUMINIUM

- 1.- Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.
- 2.- Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
- 3.- Carefully clean away excess fixing material. This is crucial as anodized aluminium may be damaged by alkaline and other ingredients contained in fixing material. We recommend cleaning the trim with clean water and neutral detergent and a non-abrasive cloth or sponge. Immediate cleaning is required to avoid corrosion stains on the anodized finish and unwanted change in the appearance of the trim.

### STAINLESS STEEL

- 1.- Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.

- 2.- Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
- 3.- Carefully clean away excess fixing material to avoid possible corrosion stains and changes in the appearance of the trim. We recommend cleansing with a non-abrasive cloth or sponge.

### IMPORTANT

Tones:

One of the normal characteristics of the raw material used in the manufacture of our products is the possibility of tone variations in different production runs, and so no claims can be accepted for this concept.

Transport:

If the company organizes delivery of the merchandise, the purchaser must check the merchandise upon receipt of the material, ensuring that the products correspond to the material sent and indicated on the delivery slip and that the material shows no sign of damage and is in perfect condition. If any discrepancy exists either in the quantity of material delivered or in the state of the material, then all damages and shortages should be noted on the transport agencies delivery slip (for example, damaged material, discrepancy between amounts delivered and amount on delivery slip etc.). All claims must be made within 7 days of reception of the merchandise. No claims will be accepted after this period. If no discrepancies are noted upon reception, neither the transport agency nor the company can accept claims for damages or loss.
